

Byines — Project Summary

What It Is

Custom e-commerce platform for a luxury modest fashion boutique (abayas, kimonos, scarves, niqabs). Replaces manual Instagram/WhatsApp sales with a full digital storefront.

Tech Stack

PHP 7.4+ (no framework) · MySQL (PDO) · Vanilla JS · Custom CSS · Apache (XAMPP)

Architecture

- **OOP models** in `classes/` (one class per DB table)
- **Thin pages** in `pages/` (fetch data, render HTML)
- **AJAX handlers** for cart, checkout, admin operations
- **Singleton PDO** via `Database::getInstance()`
- **8 stylesheets** loaded per-page, zero inline CSS (except dynamic PHP values)

Implemented Features

Area	What Works
Auth	Register, login, logout, password hashing
Shop	Category filter, price sort, pagination (12/page)
Product	Image gallery, color/size select, dynamic price, stock check
Cart	Session-based, AJAX add/remove/update, live badge count
Checkout	Shipping form, COD/PayPal, tax 10%, shipping calc, AJAX submit
Post-Order	Order summary, WhatsApp share button
Dashboard	Order history, profile edit, password change, delete account
Reviews	Read & submit with star ratings
Wishlist	AJAX add/remove
Admin	Stats dashboard, product/category/collection CRUD, order mgmt
Admin Images	Drag-drop upload, color tagging, reorder, set main
Admin Stock	Variant table, add new, inline edit modal

Not Yet Implemented

- Search / contact form / address book / password reset
- Admin review moderation & user management
- Sales charts (Chart.js not wired)
- CSRF tokens
- Email notifications

- Real payment gateway
- PWA / loyalty program
